

**AGREEMENT
FOR THE CREATION OF AN
INTERNATIONAL ASSOCIATED LABORATORY (LIA)**

**“Urban spaces, mobilities, ‘citadinité’,
Southern Europe – Mediterranean Basin (15th-21st centuries)”
“MEDITERRAPOLIS”**

BETWEEN

The **CENTRE NATIONAL DE LA RECHERCHE SCIENTIFIQUE**, hereinafter referred to as the “**CNRS**”, a public scientific and technological institution, with headquarters at 3, rue Michel-Ange 75794 Paris Cedex 16, France, represented by its **Chairman - Chief executive officer, Mr. Antoine PETIT**,

AND

AIX-MARSEILLE UNIVERSITÉ, hereinafter referred to as “**AMU**”, a public scientific, cultural and professional institution, with headquarters at Jardin du Pharo, 58, boulevard Charles Livon, 13284 Marseille Cedex 07, France, represented by its **President, Mr. Yvon BERLAND**,

CNRS and AMU acting jointly in their own name and on behalf of:

- Temps, espaces, langages Europe méridionale Méditerranée (TELEMME), UMR 7303, Director: Xavier DAUMALIN

AND

The **ÉCOLE FRANÇAISE DE ROME**, hereinafter referred to as “**EFR**”, a French public research institute, with headquarters at Piazza Farnese, 67, 00186 Roma, Italy, represented by its **Director, Mrs. Catherine VIRLOUVET**,

acting in its own name

AND

The **SAPIENZA UNIVERSITÀ DI ROMA**, hereinafter referred to as “**Sapienza**”, a public institution of academic education and research, headquartered in 5, Piazzale Aldo Moro 00185 Roma, Italy, represented by its **President, Mr. Eugenio GAUDIO**,

acting in its own name and on behalf of:

- Dipartimento di Storia, Culture, Religioni, Director: Emanuela PRINZIVALLI
- Dipartimento di Scienze sociali ed economiche, Director: Pierpaolo D'URSO

AND

The **UNIVERSITÀ DEGLI STUDI ROMA TRE**, hereinafter referred to as “**UNIROMA3**”, a public institution of academic education and research, headquartered in Via Ostiense 159, 00154 Roma, Italy, represented by its **Rector, Mr. Luca PIETROMARCHI**,

acting in its own name and on behalf of:

- Centro per lo studio di Roma (CROMA), Director: Carlo Maria TRAVAGLINI

AND

The **ISTITUTO DI RICERCHE SULLA POPOLAZIONE E LE POLITICHE SOCIALI-CONSIGLIO NAZIONALE DELLE RICERCHE**, hereinafter referred to as “**CNR-IRPPS**”, a public interdisciplinary research institute, with headquarters in Via Palestro, 32, 00185 Roma, Italy, represented by its **Acting Director, Mr. Daniele ARCHIBUGI**,

acting in its own name

Hereinafter referred to jointly as the “Parties” or individually as the “Party”.

PREAMBLE

Since many years, the **PARTIES** develop a scientific collaboration on the relation between **history and contemporary urban societies, focusing on Southern Europe** in its relation to the larger **Mediterranean area**. The convergence of knowledge, research topics and scientific tools is especially evident in the fields of history (medieval to modern, including history of cartography), anthropology, sociology and geography (mobility/migration, culture and urban projects, port economies, political cultures, heritage/memory/historical usages), demography, architecture/urbanism and policies. Scientific collaborations between the **PARTIES** have also been established within the frame of **teaching and training activities of junior scholars** (master MIFI AMU-La Sapienza, co-supervised masters and PhD, summer schools). Finally, this cooperation led to the organization of **dissemination activities** (co-signed publications and cultural initiatives).

This scientific cooperation has been **supported by A*Midex Foundation**, which funded a project coordinated by TELEMME UMR 7303, the Dipartimento di Storia, culture, religioni (DSCR) and the Dipartimento di Scienze sociali ed economiche (DisSE) of the University La Sapienza, with the participation of the EFR, UNIROMA3 and CNR-IRPPS, within the framework of the International-Mediterranean program in 2015-2016. The project resulted in several scientific meetings and co-signed publications and has enhanced junior researchers’ mobility. Another milestone of this collaboration is the signature of an **International Cooperation Agreement** between AMU and SAPIENZA on 16/03/2016.

Taking into account the existing scientific collaboration and the complementarities of research fields and tools of the involved teams, recognizing the importance of strengthening the scientific international activities, the **PARTIES** are determined to create a long-term structure for their scientific networks in the Mediterranean region, on the topic of urban space and societies.

The main objective and the final goal of this partnership is to ensure the sustainability of the existing scientific collaborations. By mutual agreement, the field of **long-term urban studies** (15th-21st centuries) has been identified for future joint programs and scientific cooperation, focusing on material civilization, inter-cultural contacts and exchanges, city cultures, power and elites, urbanization, migration, urban policies, as a reflection of the interests of the **PARTIES**.

In order to reach this goal, the PARTIES will pursue the following objectives:

1. Enhance the **scientific collaborations** between the members of the PARTIES and promote the **mobility of the researchers**, and especially that of the junior researchers (master and PhD students, junior post-docs).
2. Further the scientific **production of co-signed papers and volumes**.
3. Ensure **greater visibility to Master and PhD programs** through joint scientific activities.

As for the **scientific program**, the collaboration will focus on the cities in Southern Europe and the Mediterranean between past and present. ‘Mediterranean Cities’ are, and have been since classical times, centers for commercial and cultural interactions and crossroads of many migratory streams in the Mediterranean Basin. Historically speaking, they are ‘sedimented’ cities, having a long tradition of multi-cultural society and reception of foreigners while remaining, to this day, pivotal centers for international circulation and migration. For this reason, Mediterranean cities can be defined as the ‘hubs’ for the whole European area and, as such, are a major factor in the implementation of EU migration policies. With this combination of historical ‘sedimentations’ and centrality in contemporary migration policies, Mediterranean cities are ideally placed for carrying out case studies that will demonstrate the potential offered by an interdisciplinary project, which consists in combining, since the beginning and as a built-in feature of the project, history and social sciences, in order to study the city and urban areas from a historical perspective.

For this reason, the scientific program will rely upon concepts such as the long term, continuity and rupture, sedimentation and stratification, in order to understand the complexity and history of current urban phenomena which have deep roots in the cities’ past. The main goal is to develop a structural and sustainable collaboration between historians and social scientists and a pooling of scientific tools and methods.

The research program focuses on **three key-themes**:

1. Making of territories.
2. Mobility, ‘*citadinité*’, policies
3. Culture, heritage, memory

Consequently, the Parties agree, on the basis of this Agreement (hereinafter referred to as the “Agreement”), to establish an “International / European Associated Laboratory - LIA” which is governed by the following provisions.

CHAPTER I – CREATION, TERM, NAME, PURPOSE AND COMPOSITION

Article 1 – Creation and term

The creation of the LIA shall be effective on January, the 1st, 2018 for a term of four years.

Article 2 – Name

The LIA is called “**Urban spaces, mobilities, ‘citadinité’, Southern Europe – Mediterranean Basin (15th-21st centuries)**”.

Its abbreviation is **LIA MEDITERRAPOLIS**.

Article 3 – Purpose

The purpose of the LIA’s Agreement is to carry out the scientific program described in Annex 1 hereinafter “Program” which is an integral part of this Agreement.

Article 4 – Composition

The following laboratories and teams are involved in the LIA:

- Temps, espaces, langages - Europe méridionale Méditerranée (TELEMME), UMR 7303, Director: Xavier DAUMALIN;
- Ecole Française de Rome (EFR), Director: Catherine VIRLOUVET;
- Dipartimento di Storia, Culture, Religioni, Director: Emanuela PRINZIVALLI;
- Dipartimento di scienze sociali ed economiche, Director: : Pierpaolo D'URSO;
- Centro per lo studio di Roma (CROMA), Director: Carlo Maria TRAVAGLINI;
- Istituto di Ricerche sulla Popolazione e le Politiche Sociali - Consiglio Nazionale delle Ricerche (CNR-IRPPS), its Acting Director, Mr. Daniele ARCHIBUGI.

Article 5 – Nature of the cooperation

The LIA is not a legal entity and has no legal capacity.

It is not the purpose nor effect of the Agreement, and nothing herein may be construed in this respect, to form, create, make effective or even acknowledge the creation of a joint venture, a mandate, a company, and interest group or any other commercial group or entity, or a *de facto* company between the Parties.

CHAPTER II - ORGANIZATION OF THE LIA

Article 6 – Scientific coordinators

The LIA is coordinated by two scientific coordinators. Scientific responsibility and management of the Program are assumed jointly by:

- Prof. Brigitte MARIN, Temps, espaces, langages - Europe méridionale, Méditerranée (TELEMME), UMR 7303 (CNRS – Aix-Marseille Université).
- Prof. Silvia LUCCIARINI, Dipartimento di Scienze sociali ed economiche, Università di Roma La Sapienza.

Together they shall coordinate the LIA's Program, the provisional budget and the annual financial and scientific reports to be submitted to the Steering Committee.

Article 7 – Steering Committee

7.1. Composition

A Steering Committee is established and composed of 6 members:

- The Director of the Institute of Social and Human Sciences of CNRS or his/her representative;
- The President of the Aix-Marseille Université or his/her representative;
- The Director of the École Française de Rome or his/her representative;
- The President of the Sapienza Università di Roma or his/her representative;
- The Rector of the Università degli studi Roma Tre or his/her representative;
- The Director of the Istituto di Ricerche sulla Popolazione e le Politiche Sociali – Consiglio Nazionale delle Ricerche or his/her representative.

Persons from outside the LIA may be chosen by joint agreement between the Parties for their expertise, with an advisory capacity.

Each representative may be assisted by any expert at meetings of the Steering Committee, subject to the signing of a non-disclosure agreement. These experts attend in an advisory capacity.

The scientific coordinators of the LIA attend Steering Committee meetings in an advisory capacity.

7.2. Chairman

The Chairman of the Steering Committee is appointed by and among its members on a revolving basis at each meeting.

The Chairman shall report to the Parties on the results obtained and the use of the financial resources.

7.3. Meeting

The Steering Committee meets at least once every year at the initiative of its Chairman or at the request of the Scientific Coordinators as often the interests of the LIA need it.

The decisions of the Steering Committee are adopted by a unanimous vote from present or represented members, three quarters of its members being present or represented.

Should it be impossible to physically hold a Steering Committee meeting, decisions of the Steering Committee may be adopted by teleconferencing or by written consultation.

7.4. Role

The Steering Committee shall:

- give an opinion on the progress, program and direction of research;
- decide as to the budgetary resources required for the LIA's activities;
- report to the Parties on results obtained and approve the use of the financial resources.

It may also study all others matters relating to the LIA.

CHAPTER III – FINANCIAL AND HUMAN RESOURCES

Article 8 – Financial provisions

Every year, the budget required to carry out the LIA Program shall be prepared by the two Scientific Coordinators and shall be submitted to the Steering Committee for approval. This budget includes stated requirements as well as the corresponding resources, detailed by the Parties funding them.

Annex 2, which is an integral part of the Agreement, summarizes the provisional budget for the first year of the LIA, which detail, in particular, the Parties' contributions and the suggested use of the funds. It is updated every year by a decision from the Steering Committee.

Each Party allocates and manages the budgetary credits corresponding to its own funding.

As well as these financial resources, each Party manages, under its own responsibility and own authority, and according to its own rules, all the resources which it provides pursuant to the LIA: equipment, premises, facilities and staff.

Once a year, each Party shall justify to the other Parties, the resources actually allocated during the previous year (including equipment, premises and staff) in respect of the LIA. To this end, each Party draws-up a review of the financial resources allocated and their use (expenditure).

Use of the funding made by each scientific coordinator for the LIA program described in **Annex 1**, may be verified at the year-end following an ordinary request from an authorized representative of the other Party. The credits used by each scientific coordinator for the LIA are subject to the usual controls in the respective countries so as to verify their compliant use in accordance with the Agreement.

Article 9 – Staff

The staff solicited by the scientific coordinators to contribute to the Program shall remain fully attached to their original organization and carry out their work on the basis of instructions from their superiors. The scientific coordinators discuss on the terms and conditions, schedule and scope of the involvement of these employees in the implementation of the joint scientific program. **Annex 3** summarizes this involvement for the first year of existence of the LIA. The Parties shall be immediately informed of any changes and **Annex 3** be updated.

Use of the infrastructures and/or equipment by the Parties' staff is subject to compliance with the health and safety rules established by the owner Party.

For the purposes of the LIA, the staff of a Party may have access to the other Parties' premises, subject to compliance with the by-laws of the Party controlling the premises and, possibly, to the signing of a hosting agreement.

Article 10 – Research contracts

The research contracts which the Parties wish to establish, within the framework of the LIA, with public or private, French or foreign third parties organizations are signed by all the Parties.

They are negotiated by one of the Parties as designated by the Steering Committee. The authorized Party keeps the other Parties informed of the results of the negotiations. The latter have fifteen (15) days to provide their opinion on the final draft. Subsequent to this period, opinion is deemed to be favorable.

Research contracts are managed by the Party which conducted negotiations. Nevertheless, the LIA's Steering Committee may wish another Party to manage one or more contracts. In this case, it shall inform each Party.

Non-disclosure clauses in these research contracts shall not prevent the relevant researchers from being entitled to mention their work in their activity report, which does not represent disclosure within the meaning of intellectual property legislation.

The contracts specifically provide that general support expenses are covered by the authorized Party for the activities which they enable to be developed. The relevant amounts, set after discussions between the Parties, are allocated to the authorized Party's budget for the corresponding amount.

For research contracts managed by the CNRS and including staff expenses, a deduction, representing a provision for redundancy, is made on the compensation, exclusive of taxes, but including social security and employer contributions.

CHAPTER IV – INTELLECTUAL PROPERTY

Article 11 – Publications

Each Party undertakes to provide the other Parties with all the information required for carrying-out joint research work. Scientific results shall be published according to the usual custom and practice of the scientific community.

Publications related to the work carried-out in common within the framework of the LIA shall mention the connection with the Parties of the LIA. They shall include the words ***“Research conducted within the context of the International Associated Laboratory « Urban spaces, mobilities, ‘citadinité’, Southern Europe – Mediterranean Basin (15th-21st centuries) » – LIA MEDITERRAPOLIS”***.

Any and all publication related to the work carried-out in common within the LIA shall be subject, during the term of this Agreement and for two years after its expiry date, to the agreement of the other Parties which shall notify their written decision within two months of receipt of the draft publication at the latest. Thereafter and in the absence of an objection, agreement shall be deemed to have been given.

Consequently, all draft publications are referred for the opinion of the other concerned Parties which may remove or change certain information, the disclosure of which could compromise industrial and commercial use, under optimum conditions, of the results of the work carried-out in common within the LIA. Such removals or changes shall not compromise the scientific value of the publication.

Article 12 – Confidentiality

The Parties undertake to ensure that the information exchanged pursuant to the LIA and identified as confidential (hereinafter referred to as the “Confidential Information”):

- a) is kept strictly confidential and is protected to the same extent as their own Confidential Information;
- b) is only provided to their members of staff requiring knowledge thereof and is only used in application of this Agreement, for four years as from its date of communication.

Any and all other communication or use of the Confidential Information is subject to the prior and written authorization of the communicating Party. Each Party undertakes to ensure that its staff referred to in section b) hereinabove comply with the provisions of this Agreement.

Notwithstanding the foregoing provisions, each Party may provide Confidential Information for which it is able to prove:

- that it was in the public domain prior to its communication or subsequent thereto, but without any breach being attributable to it;
- that it was received legally from a third party;
- that it was already in its possession prior to the execution of the Agreement;
- that it was developed independently and in good faith by its members of staff who did not have access to said Confidential Information.

Moreover, these provisions may not preclude:

- either the obligation binding on all personnel involved in the Program to provide an activity report to its institution, such communication does not represent disclosure within the meaning of intellectual property legislation;
- or the defense of the thesis related to the Program of this Agreement, with such defense being organized whenever necessary so as to guarantee, in compliance with effective university regulations, the confidentiality of certain results of the works carried-out pursuant to the Program.

Article 13 – Results

13.1. Ownership of results

The results, whether patentable or not, hereinafter referred to as the “Results”, which are obtained pursuant to the present Agreement are the equal property of the Parties, hereinafter referred to as the “Joint Owners”.

Each Joint Owner retains ownership of the knowledge acquired by it outside this collaboration. Each Joint Owner is entitled to use, free-of-charge, the Results for the sole purposes of its research and for research collaboration with third parties, to the exclusion of any and all other direct and/or indirect use for commercial purposes.

13.2. Appointment of an Administrator for the protection and exploitation of the Results

The Joint Owners designate among them an Administrator Institution (hereinafter referred to as to “Administrator”) to be in charge of the protection and the exploitation of the results.

Nevertheless, for each Result jointly owned by the French Parties, possibly with other Parties, a French Party (hereinafter referred to as the “Mandatory”) is designated in accordance with the French law. The Mandatory represents the French Parties Joint Owners.

13.3. Protection of the Results by patent

Patent applications are filed in the joint name of the Joint Owners; the name of the inventor(s) shall be mentioned.

The Administrator has an express mandate from the other Joint Owners so as to manage the filing of patent applications and for obtaining and maintaining the resulting patents.

The Administrator assumes responsibility for steering and monitoring the priority filing procedures; it shall keep the other Joint Owners, represented by the Mandatory Institution when appropriate, informed of the progress of the application and provides the list of foreign countries in which extensions shall be filed.

Should one of the Joint Owners waive entitlement to file or maintain a patent and/or part of the extensions effective, it shall advise the other Joint Owners, represented by the Mandatory when appropriate, thereof within a reasonable timeframe so that they may continue lonely the procedure.

In addition, the waiving Joint Owner undertakes to sign or get signed all documents enabling the other Joint Owners to become sole owners of the said patent(s); the Joint Owners which continue with the procedure through the Administrator shall be the sole beneficiaries of any income generated by use of the patent in the countries for which the other Joint Owner waived entitlement to continue with the procedure.

The expenses relating to filing, the issuing procedure, keeping effective and extending patents (hereinafter designed as the costs of intellectual property) are supported by the Administrator

13.4. Legal proceedings relating to patents

All the Joint Owners shall inform each other of any action for infringement by a third party against the Results, a declaration of invalidity, a claim or infringement of the Results by a third party.

All the Joint Owners shall act together to jointly agree on the strategy to adopt and shall supply each other with all the evidence in their possession permitting an evaluation of the nature of the dispute.

In the event of it not being possible to obtain a consensus, each of the Joint Owner may on its own and at its own expense take the actions which appear to it appropriate, it being understood that in this event, any compensation resulting from such actions ordered by the court shall wholly and irrevocably be the property of the Joint Owner acting.

13.5. Exploitation of the Results

The Administrator receives an express mandate from the other Joint Owners, to carry out all exploitation-related work. In particular, it negotiates contracts on behalf of the Joint Owners with all companies wishing to exploit the Results.

The Administrator shall keep the other Joint Owners, regularly informed of the results of the negotiations. Any licensing agreement shall be signed by all the Joint Owners.

After deduction of the costs of Intellectual Property from the incomes resulting from the Exploitation of the Results the Administrator shall repay to the Joint Owners represented by the Mandatory, when appropriate a proportion of the royalties resulting from the exploitation of the Result(s), less a contribution to the exploitation expenses of the Administrator representing a maximum of 20% of gross incomes, corresponding to the incomes deduction made for the costs of Intellectual Property.

13.6. Software and databases

Each Party remains sole owner of the software and databases obtained by it outside the framework of the LIA.

The software and its extensions, and the databases, which are obtained in common, are the joint property of the Parties.

The Parties have a free and non-assignable right-of-use over this software and databases for the Program requirements. For databases, the right-of-use relates to both the structure and content and includes an extraction right.

In the event of the granting of rights-of-use to third parties over the software and databases obtained in common, the royalties received in this respect shall be shared equally between the Parties by the Administrator.

CHAPTER V – MISCELLANEOUS PROVISIONS

Article 14 – Renewal – Assessment

The Agreement may be renewed once, by written amendment.

At any time, the Parties may agree to form an ad hoc committee, in particular, in the event of the renewal of the LIA, in order to assess the LIA's activities and to make recommendations to its Program.

Article 15 – Adhesion, termination, withdrawal and exclusion

15.1. Adhesion

The Steering Committee may accept new laboratories from the Parties in the LIA.

The adhesion of new Parties to the LIA requires the signing of an adhesion amendment to the Agreement and becomes effective on the date of such signature. Subject to a unanimous decision from the Steering Committee concerning the adhesion application, the Parties grant a mandate to the CNRS to sign the adhesion amendment in the name of all the signatory Parties of the Agreement.

All the Parties shall be informed of any new adhesion application (Laboratory or Party).

15.2. Termination

In the event of an unresolved dispute, the Parties may decide by joint agreement to terminate the Agreement before its term, upon six (6) months' written notice.

15.3. Withdrawal

Any Party may withdraw from the LIA with six (6) months' notice given by registered letter with acknowledgement of receipt. The Steering Committee shall approve the financial conditions of the withdrawal.

15.4. Exclusion

In the event of insufficient involvement in achieving the targets of the LIA or a Party's breach of its obligations, a Party may be excluded from the LIA by a unanimous decision of the Steering Committee; the concerned Party does not take part to the vote.

Article 16 – Administrative Domiciliation

The administrative location of the LIA is set at **TELEMME, UMR 7303, MMSH, 5 rue du château de l'horloge, BP 647, 13094, Aix-en-Provence, Cedex 2, France**. It may be changed by a proposal from the Steering Committee, subject to the Parties' consent.

Article 17 – Liability

Each Party remains liable, without right of action against the other Parties, with the exception of cases of gross or intentional negligence, for repairing damage to its own property owing to, during the performance of this Agreement.

Should damage be caused to physical assets acquired by the Parties under this Agreement, the latter shall pay the repair or replacement charges for said assets on a pro rata basis of their respective financial contributions to the acquisition thereof.

According to the rules of ordinary law, each Party is liable for damage / loss of any nature caused to third parties during the performance of this Agreement.

Article 18 – Final provisions

The provisions of Chapter IV shall survive notwithstanding the expiry or termination of the Agreement or the withdrawal or exclusion of one of the Parties involved in this collaboration.

All research activities conducted in connection with the LIA shall be done in compliance with all the applicable laws, regulations, and guidelines of the countries and institutions in which the research is conducted.

The Parties shall endeavor to settle their differences out of court in an amicable way.

Should they fail to do so, any disputes may be settled in accordance with the rules of conciliation and the arbitration of the International Chamber of Commerce, under the aegis of one or more arbitrators appointed pursuant to these rules.

The Agreement is drafted in six (6) originals.

ANNEX 1:

PROGRAM

As mentioned above, the scientific program of the LIA Mediterrapolis focuses on the cities of the Mediterranean area between past and present. The LIA is organized in three research axes:

1. Making of territories

Researches in this field study the process of constructing urban territories, with particular emphasis on social issues. The city is studied from the historical perspective as a product of social phenomena and, above all, as a space in perpetual transformation. Particular attention is given to the role played by inhabitants (whether permanent or temporary) in the city and in its territorial development. While the study of city transformation usually concentrates on major operations in urban development that are not merely spectacular, but also exceptional, the project will focus on more modest operations of construction, expansion and maintenance by individual citizens. On the one hand, researches will focus on the role played by minor municipal authorities and urban bodies in the process of the urban development in the cities of the past. On the other hand, the notions of resilience, and urbanism from below will be mobilized in order to describe the ordinary dimension of the urbanization dynamics.

2. Mobility, ‘*citadinité*’, policies

Mobility and insertion and urban policies are the main focus for this research theme. It is a transversal theme, since municipal and national policies for controlling mobility, which are constantly at the core of current debates, exist at least since the Middle Ages. Interdisciplinary research on this topic will thus reveal here its potential in studying migration policies. This theme will also focus on the experiences and insertion of individual migrants and on the movement and journeys of migrant groups in the Mediterranean Basin as the passage of men and women through their gates has had a profound impact on these ‘pivotal cities’. The concept of ‘*citadinité*’ will be a key element in understanding the sense of ‘belongingness’ in the city. ‘*Citadinité*’ challenges the definitions established by legislation and encompasses awareness, knowledge and daily interactions that are essential for belonging in the urban environment.

3. Culture, heritage, memory

The research developed in this axe studies the relationship between past, memory and contemporary urban identities. It focuses on how places and territories are constructed over time, how they become invested with certain values and how those values remain present, are modified, or even eliminated. In particular, the researchers will focus on the history of urban mobility (in terms of cultural manifestations and heritage) and of the material contributions made by strangers and migrants in Mediterranean cities. The development of cultural and territorial identities (both in the city and in specific urban districts) and their relationship with their common history will also be included in this research theme. The production of sites and territories raises the question of spatial identities, those collections of values that emerge in certain areas, are expressed as manifestations of history and memory, and offer people references for their own identity, definition and interaction with others.

LIA scientific activities are organized around the above-mentioned axes. In particular, a series of topics have been identified that will be addressed in the meetings and initiatives listed below, organized by sub-groups which gather together researchers of the six units for the period 2017-2018.

Axe 1

Ordinary urbanism. The making of the city from below
 Historic cartography and urban atlas
 Neighbors, dwellers and urban districts

Contemporary uses of historical buildings

Axe 2

Housing mobility

From/to the city. Hinterland, Suburbs and Mobility

Port cities and people in transit

Axe 3

Reading, Telling and Thinking the contemporary city

Historical monuments and architecture of the power

Multi-ethnic neighborhoods
